

Seamless business connectivity from Thomson Reuters.

Better data connections build better answers.

57%

of tax departments expect significant change to government requirements in the next 1-2 years¹

Global indirect tax challenges aren't getting any easier

Achieving optimal sales and use tax, GST, and VAT compliance, and doing it on time, is increasingly difficult.

- New regulatory rules and real-time filing processes
- New channels and opportunities (e.g., e-commerce)
- Continued cost pressure on tax department

Accuracy is foundational

Compliance is about the right answer. Innovation lets us get it faster—and multiply its value. Getting modern sales and use tax, VAT, and GST right means bringing content, business data, and calculation together in real time.

- Cloud-native tax engine with improved data transparency
- More accurate tax calculations, faster
- Broader global content coverage

Compliance and meeting deadlines far outpace all other tax department metrics for success.¹

Integration is how we build

When the right answers are shared with the right enterprise-wide workflows, business revenue and growth become the focus, with less worry about compliance.

- Robust APIs for flexible data connections
- Plug into both traditional and cloud-based ERP and business tools
- Not just connecting, but integrating process and information

\$1M+

Adobe saved by exposing their source of tax risk and moving to a single platform, reducing unnecessary tax management costs²

45%

of tax departments introduced technology and automation to address strained resources – the most common strategy cited¹

Automation is how we deliver

A centralized, fully integrated, and automated process for indirect tax enables tax teams to focus on high-value goals and initiatives.

- Reduce errors and omissions
- Better-prioritized resource use
- Improve cross-team collaboration
- Lower time and cost of operations

Thomson Reuters® Indirect Tax Integrations: Connected systems drive business value

ONESOURCE® Determination seamlessly integrates with your **ERP, finance, and e-commerce systems** to eliminate manual tax management, improve operational efficiency, and enhance business growth.

CONNECTED WORKFLOWS
